

Lost in the information society. Where is digital journalism going?

Giacomo Buoncompagni, University of Macerata
g.buoncompagni@unimc.it

Main topics:

1. Journalism as a contaminated field
2. Post-reality/truth in the media
3. Three issues of the current journalistic field:

a. content and care of the news

b. journalistic culture

c. inter-generational issues (between audience and journalists)

1. Journalism as a contaminated field

Journalistic field: cultural space subject to hybridisation, rules and controls, especially economic ones

Polluted by what?

Politics

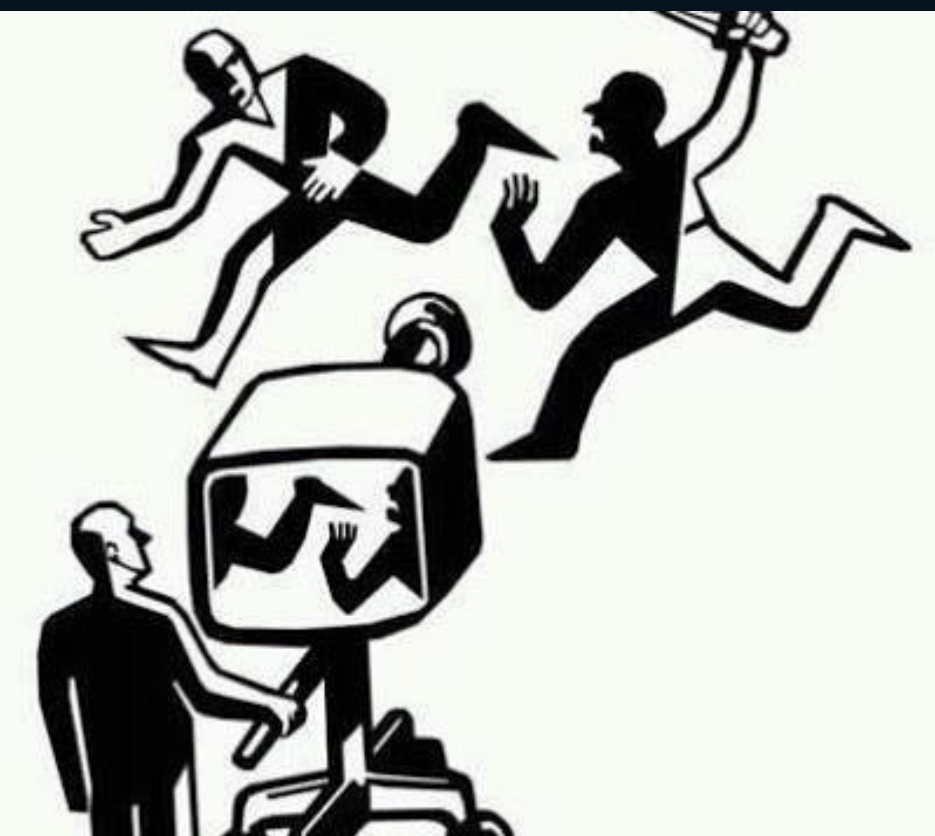

Global market

Algorithms /robot journalists

‘Over-participation’ (publics and media consumption out of control – *news desert/avoidance*)

Content VS news

Truth in journalism is a non-issue!

2. Post-reality/truth in the media

- *Social reality and media reality*
- *Information as entertainment*
- *Newsmaking*

Three issues of the current journalistic field:

a. Content and care of the news: **what** circulates most in the media and **why**?

b. Journalistic culture:

-how well do journalists today know **how to report on social problems**?

-how much do their audiences know how newspapers work and **how news is constructed**?

c. Inter-generational issues (news production and consumption practices):

-young and old journalists

-young and old media audiences
